

Series 4400

High Speed Dual Pail Palletizer

Custom designed to your particular specifications

*This machine was a drum palletizer that palletized over 5,000,000 – 55 gallon drums and retrofitted to palletizer 40 – 5 gallon ppm., equipped with PASCO's new Pail Retention System.

Flexibility Ability to handle several different size pails through the same machine, with the ease of a selector switch or fully automatically.

Modular Design Machines are fully integrated into your present and future facilities and can be manufactured in several different configurations.

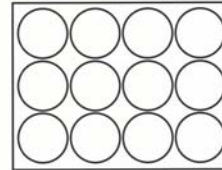

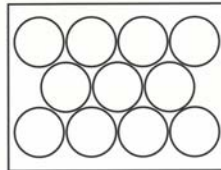

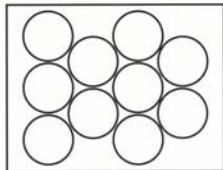

Reliability A 3 to 1 Design Safety Factor means our machines are the most rugged available. Square tube and I-beam construction can withstand heavy loading and lift truck abuse even in the most caustic environments.

Economy Attention to ergonomics reduces costs due to personal injury claims PASCO palletizers enable you to increase production rates through automation.

Specifications

- Frame** $\frac{3}{16}$ " x 4" x 4" square tubing, 8" channel, 8" I-beam, 4" x 9" x $\frac{1}{2}$ " angle
- Elevation** Standard – Infeed: 27 $\frac{1}{4}$ " Discharge: 21"
Minimum – Infeed: 20" Discharge: 13 $\frac{3}{4}$ "
Other Elevations available
- Features** Built to the customer's specifications using the controls and components of your choice: Allen Bradley, G.E. Reliance and Photoswitch. The Series 4400 has the capacity to handle 2 $\frac{1}{2}$ to 7 gallon pails, 8 to 33 gallon kegs and 30 to 60 gallon drums and can be manufactured to handle different container combinations, i.e. drum/pail, etc. with multiple sized pallets through the same machine.
- Rate** Speeds up to 40 pails per minute.
- Options** Can be manufactured for food, drug and metric applications.
Overhead or side wiper
Rigid conduit
Status indication lights
Emergency stop systems
Built to your electrical specifications, Nema 12, 4, 4x, 7 etc.
Virtually any pallet pattern, including:
