

SERIES 6655 - HIGH SPEED

Low Level Bag Palletizer

Custom designed to your particular specifications

Handle several different-sized bags in multiple patterns and pallet sizes on the same machine, at speeds up to 4 layers per minute.

Key Benefits

- **Flexibility** to handle multiple bag sizes, pallet sizes and patterns; place slipsheets between layers or unitize loads without pallets
- **Modular design** to fit your plant layout and maximize floor space
- **Easy operation and maintenance**, with user friendly operator interface and virtually no proprietary components
- **Increased production rates** ... Stack up to 4 layers per minute.
- **Reduction of risk and costly injury claims** associated with heavy lifting ... PASCO palletizers have built-in safety and ergonomic features.
- **Durable, long-lasting equipment** ... Features include sturdy steel frame with square tube and I-beam construction, to withstand heavy loading and fork truck abuse even in the most caustic environments.
- **Excellent ROI**, often in two years or less

Specifications

Elevation: Standard-infeed: 36" to 40" Discharge: 18"
(Other elevations available at no extra charge)

- Features:**
- Built to your specifications, using the controls and components of your choice (Allen Bradley, Siemens/TI, G.E., etc.)
 - Multiple bag sizes and patterns can be handled through the same machine, to provide maximum flexibility.
 - Five types of bag-turning devices, customized to suit your particular bag and pattern
 - Individual layer squaring and compression
 - Rigid conduit with flex ends and rack and pinion wipers, to provide durability
 - "True pallet centering" means the pallet is placed correctly from the start to ensure correct load placement

Rate: Speeds up to 4 layers per minute

- Options:**
- Complete systems integration, using diverters and accumulation conveyor and fully automatic changeover
 - Bag flatteners, knock-down device, bag kickers
 - Check-weigh and reject stations
 - Slipsheet dispensers
 - Interlocking and overlapping patterns
 - Emergency stop and low-pallet beacons and other status indicator lights
 - Modem access for instant program changes and troubleshooting
 - Built to your electrical specifications (NEMA 12, 4, 4x, 7, etc.)
 - Unitizer, to handle loads without pallets
 - Stainless steel packages
 - Virtually any pallet pattern, including those below
