

SERIES 4200 - HIGH SPEED

Pail Palletizer

Custom designed to your particular specifications

Handle several different-sized pails in multiple patterns and pallet sizes on the same machine, at speeds up to 25 pails per minute.

Key Benefits

- **Flexibility** to handle several different-sized pails through the same machine with the flip of a selector switch, or fully automated
- **Modular design** to fit your plant layout and maximize floor space
- **Easy operation and maintenance**, user friendly operator interface and virtually no proprietary components
- **Increased production rates** ... Stack up to 25 pails per minute.
- **Reduction of risk and costly injury claims** associated with heavy lifting ... PASCO palletizers have built-in safety and ergonomic features.
- **Durable, long-lasting equipment** ... Features include sturdy steel frame with square tube and I-beam construction, to withstand heavy loading and fork truck abuse even in the most caustic environments.
- **Excellent ROI**, often in two years or less

See reverse side for specifications.

Video available upon request.

Specifications

Frame: 3/16" x 4" x 4" square tubing, 8" channel, 8" I-beam, 4" x 9" x 1/2" angle

Elevation: Standard-infeed: 24" Discharge: 18"
Minimum-infeed 20" Discharge: 13 3/4"
(Other elevations available at no extra charge)

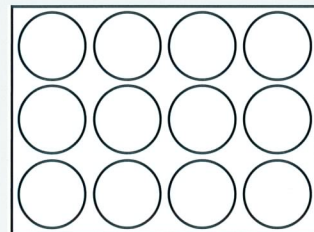

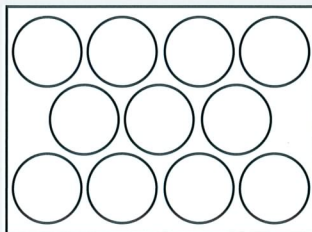

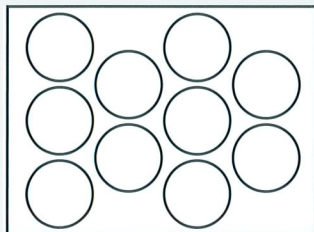

Features:

- Built to your specifications, using the controls and components of your choice (Allen Bradley, Siemens/TI, G.E., etc.)
- Multiple sizes from 2 1/2 to 7-gallon pails can be handled automatically through the same machine to provide maximum flexibility.
- Rigid conduit with flex ends to provide durability

Rate: Speeds up to 25 pails per minute (See PASCO Series 4400 for rates up to 40 pails per minute.)

Options:

- Complete systems integration, using diverters and accumulation conveyor and fully automatic changeover
- Rotators for label orientation
- Electric/Pneumatic and Semi-automatic models available
- Emergency stop and low-pallet beacons and other status indicator lights
- Modem access for instant program changes and troubleshooting
- Stainless steel packages
- Built to your electrical specification (NEMA 12, 4, 4x, 7, etc.)
- Virtually any pallet pattern, including staggered patterns
